

# Singlepagefolio

## Setting up the Contact Form Mail

Go to **Contact** ☐ **Contact Forms**

select **Mail** tab

put the email address where you want to receive the contact form messages in the **To** field

then follow the suggestion to fill the other fields as you want.

The screenshot shows the 'Contact Forms' management interface in the Singlepagefolio theme. The left sidebar contains a navigation menu with options like Dashboard, Posts, Footer, Media, Pages, Comments, Flamingo, Contact, Contact Forms, Add New, Integration, Projects, Appearance, Plugins, Users, Modal, Lightbox, Tools, Settings, and Collapse menu. The 'Contact' section is highlighted. The main content area shows the configuration for a contact form titled '[contact-form-7 id="106" title="singlepagefolio form"]'. The 'Mail' tab is selected, displaying fields for 'To', 'From', 'Subject', 'Additional Headers', and 'Message Body'. The 'To' field contains 'youremail@yourdomain.com' and is pointed to by an arrow from a callout box that says 'PUT YOUR E-MAIL ADDRESS HERE!'. The 'From' field contains '[your-email]', the 'Subject' field contains '[your-subject]', and the 'Message Body' field contains a template email body with placeholders for name, email, subject, and message. The right sidebar shows 'Delete' and 'Save' buttons, and an 'Information' section with links to Docs, FAQ, and Support.

then click **save**

**Note: consider using the recommended WP SMTP plugin in case you don't receive any emails.**

Then if you want to go further you can customize the form feedback messages from the [Messages](#) tab.
