

Singlepagefolio

How to Use Projects

Projects are the main feature of the theme, they allow you to show your works in a unique way. Here is how to use them.

From the main dashboard menu:

Projects ☐

Projects to manage the projects;

Add Projects to add a new project;

projects Tag to add project Tags (they work exactly as the post Tag).

Here's what you can set up for a project:

- **Title** (the project name);
- **Permalink** (the project name that will be in the url of the project. eg. www.yoursite/projects/project-slug) note: the portfolio is a single page application so you won't directly see this url;
- **Text content** (put here just text, as abstract of the project description);
- **Publication/online date** (the date you released the project, only month/year will be shown in the portfolio);
- **project External Link** (link to the project, eg. a website, or to the blog post as the detailed info about the project, in this case just put the slug of the post);
- **Main project** (check this if it is the main project) *note*: see below to learn about projects positions;
- **Img (n) carousel** (the image you see when you select a project as a slider preview, you can choose up to 3 of them) note: the notes within will help you to know the right ratio/dimension of the image;
- **Publish** (panel) (it is standard so it works as the post one);
- **Attributes** ☐ **Order** (it sets the project position in the portfolio) *note*: see below to learn about projects positions;
- **Featured Image** (the preview image of the project) note: the note within will help you to know the right ratio/dimension of the image;

- **project Tags** (they work exactly as the post Tag but they will be related to the projects);
- **Label url** (naming of the project's link. If you leave empty here no link will be shown).

Project positions

The positions of the project in the portfolio depends on **Attributes** ☐ **Order**, and in case of Main project on the **Main project** checkbox too, as mentioned above.

Feugait imperdiet ius an, no quis facer lucilius vis. Aliquam saperet contentiones ex pro, id idque offendit ius. Fugit suavitate ad eam, ut essent debitis cum.

NOTE: Featured image must be 500x400 pixels, except:
 - main project must be 900x800 pixels;
 - project just below the main one (with attributes->order=1) must be 900x400 pixels.

publication/online date
 insert the online/publication date
 15/03/2011

project external link
 link here your project to an online external page. (or even a description post if you want)
 new-post

main project
 is this the mani project? (if yes check this!)
☒ is this the mani project?

project Tags
 Add
 Separate tags with commas
 ✕ project tag 1 ✕ project tag 2
 ✕ project tag 3 ✕ project tag 4
[Choose from the most used tags](#)

label url

The visible projects are 8, they take the **Attributes** ☐ **Order** number from 0 to 7.

Here's how they are in the portfolio relatively to **Attributes** ☐ **Order** number:

The rest of **Attributes** ☐ **Order** numbers will publish the project in the projects archive.

I suggest you to use for these not 8-9-10... but 80-90-100... it will be very useful when you decide to put some other project between the others.

The archive projects are ordered from left to right (eg. 80 ☐ 90 ☐ 100 ☐ 110...).

The maximum number of visible projects in the archive is 20.
