Singlepagefolio

Further Customization

You can take your customization further if you want.

Changing colors

You can change all colors of the theme in a few minutes.
Singlepagefolio comes with a **CSS folder** with 2 main css files
singlepagefolio.css (the portfolio style sheet) and **singlepagefolio-blog.css**
(the blog and alternative front page style sheet).
All colors of the template are at the bottom of this 2 css files, with comments
describing what the relative color going to change.
Many elements are grouped so you can change the color for the relative group
of elements at once, therefore managing it as a theme variant, not as a single
element variant.

Singlepagefolio style sheet

```
762
763    /*COLOR CUSTOM MANAGMENT*/
764        /*HEDAER*/
765    /*header background color*/
766    #page #masthead { background:#333;}
767
768    /*portfolio menu link  color*/
769    #page #masthead #site-navigation .menu-portfolio-container #menu-portfolio
       .menu-item a {color:#E1DDC6;}
770    /*portfolio menu link over color*/
771    #page #masthead #site-navigation .menu-portfolio-container #menu-portfolio
       .menu-item a:hover, #page #masthead #site-navigation .menu-portfolio-container
       #menu-portfolio
772    .menu-item a.here { color:#f0efe4;}
773
774    /*site title  color*/
775    #page #masthead h1 {color:#fff;}
776
777        /*BODY*/
778    /*body bg color*/
779    body.custom-background, body, #page #main #archive { background-color: #000
       !important;}
780
781        /*PANELS*/
782    /*panels bg color*/
783    #page #main #portfolio .tex, #page #main #archive #loadarch #contarch
       #contscroll .progetto-arch .tex-arch, #page #main #portfolio .tex a {
       background-color:#333;}
784    /*panels rollover bg color*/
785    #page #main #portfolio .progetto .overl { background-color:#333;}
```

singlepagefolio-blog style sheet

```
1688
1689    /*COLOR CUSTOM MANAGMENT*/
1690        /*BODY main text color*/
1691    body, input, textarea, p {color: #F4F4F4 !important;}
1692
1693    /*background e borders items*/
1694    .main-navigation ul.nav-menu, .main-navigation div.nav-menu > ul, #secondary
        aside, .entry-content, .comments-area, .entry-summary, article.format-link
        header, .format-status .entry-header  { background-color: #444 !important; }
1695    h1.site-description, .entry-title, .site-content article, article.format-link
        header, .format-status .entry-header {border-color: #444 !important;}
1696    .menu-toggle:hover, button:hover, input[type="submit"]:hover,
        input[type="button"]:hover, input[type="reset"]:hover, article.post-password-
        required input[type="submit"]:hover {color: #444 !important;}
1697    /*variant IF YOU want some variety for some bloc - IF you don't just put the
        same color as up here*/
1698    .entry-meta, .commentlist, .archive-header, .page-header, article.sticky
        .featured-post { background-color: #3c3c3c !important;}
1699        /*sticky post*/
1700    .site-content article.sticky { background-color: rgba(255, 255, 255, 0.1);}
1701
1702    /*secondary text*/
1703    footer.entry-meta, .archive-title, .archive-meta, .widget_recent_entries
```

The theme provides the **.less** files in the same folder, so if you know how to use **Less** you can find it easier to manage colors and other aspects.

Adding Google Analytics Code

You can monitor your site using Google analytics.
You can insert the Google Analytics Code in the **Header.php** file (in the main theme folder). Just paste it over the comment:
<!--place here google analytics code-->

```php
<?php
/**
 * The Header for our theme.
 *
 * Displays all of the <head> section and everything up till <div id="main">
 *
 * @package WordPress
 * @subpackage singlepagefolio
 * @since singlepagefolio 2.0
 */
?><!DOCTYPE html>
<!--[if IE 7]>
<html class="ie ie7" <?php language_attributes(); ?>>
<![endif]-->
<!--[if IE 8]>
<html class="ie ie8" <?php language_attributes(); ?>>
<![endif]-->
<!--[if !(IE 7) | !(IE 8)  ]><!-->
<html <?php language_attributes(); ?>>
<!--<![endif]-->
<head>
<meta charset="<?php bloginfo( 'charset' ); ?>" />
<!-- Always force latest IE rendering engine (even in intranet) & Chrome Frame -->
<meta http-equiv="X-UA-Compatible" content="IE=edge">
<meta content="minimum-scale=1.0, width=device-width, maximum-scale=1.0, user-scalable=no" name="viewport" />
<meta name="format-detection" content="telephone=no"><!-- remove formatting numbers on smartphones -->
<?php //this condition just To add backwards compatibility for older versions on title_tag, request from wp 4.1 https://codex.wordpress.org/Title_Tag
if ( ! function_exists( '_wp_render_title_tag' ) ) {
    function theme_slug_render_title() {
?>
<title><?php wp_title( '|', true, 'right' ); ?></title>
<?php
    }
    add_action( 'wp_head', 'theme_slug_render_title' );
}
?>
<meta name="description" content="<?php bloginfo( 'description' ); ?>"/>
<meta name="keywords" content="Singlepagefolfio, sigle page creative portfolio, sigle purpose portfolio" />
<meta name="robots" content="index,follow"/>
<link rel="image_src" href="<?php echo esc_url( home_url( '/' ) ); ?>wp-content/themes/singlepagefolio/screenshot.png" /><!--formatted-->
<link rel="profile" href="http://gmpg.org/xfn/11" />
<link rel="pingback" href="<?php bloginfo( 'pingback_url' ); ?>" />
<!--place here google analytics code-->
<?php wp_head(); ?>
</head>
<body <?php body_class(); ?>>
```

Info for Advanced Users

If you are an Advanced User or a Developer you could find useful, besides the **CSS** folder, the **JS** folder, **PAGE-TEMPLATE** folder and **IMG** folder.

- **JS** folder provides all the main js and a **Libraries** folder. **singlepagefolio.js** is the main Portfolio single-page-application function file;

- **PAGE-TEMPLATE** folder provides every Portfolio single-page-application php file;

- **IMG** folder has all the images of the theme.
