Singlepagefolio

How to Use Modal

Modal is a useful feature, it allows you to use a banner to communicate something to users (eg. Privacy info about cookies).

From the main dashboard menu:
Modal ☐
Modal to manage the modals;
Add New to add a new modal.

Here's what you can set up for a modal:

- **Title** (the modal name);

- **Text content** (put here your communication content, just a short text would be better);

- **Publish** (panel) (it is standard so it works as the post one);

- **Attributes ☐ Order** (it sets the priority of the modal) _note_: just one modal will be published, if you have more, the one with the lower number wins.

Not to be annoying, the modal sets a cookie that controls if the single user has already seen the message,in order to show it just once a week.
