# Singlepagefolio

## Requirements

To use Singlepagefolio, you must be running WordPress 3.5 or higher (the latest version is the best), PHP5 or higher, and mysql 5 or higher. I have tested it with Mac, Windows and the most common devices. Below are a list of items you should ensure your host can comply with:

- Check to ensure that your web host has the minimum requirements to run WordPress;

- Always make sure they are running the latest version of WordPress;

- You can download the latest release of WordPress from the official WordPress website;

- Always create secure passwords FTP and Database.
