# Singlepagefolio

## How to Use Footer

**Footer**  allows you to manage the info text and the social links in your footer.

From the main dashboard menu:
Footer ☐
Footer  to manage the footer
Add New  to add a new footer.

Here's what you can set up  for a footer:

- **Text desktop version** (the short text you want to see in the footer extended version);

- **Text mobile version** (the short text you want to see in the footer mobile version);

- **Publish** (panel) (it is standard so it works as the post one);

- **Attributes ☐ Order** (it sets the priority of the footer) _note_: just one footer will be published, if you have more, the one with the lower number wins;

- **E-mail and social links** (here you can set links to your social page, your skype user and e-mail address) _note_: if you don't need one or more of this just leave the field empty.
